

Judith D'íos

3-D Watercolor Nuno Felted Chemise or Vest Workshop

Alpaca Fiber Studio

May 8-10, 2017

Materials & Supplies List

Bring a top that fits you well, made of non-stretchy material. This will become the basis for your pattern. It can be shorter than desired length, collarless and sleeveless. (Length can be added when the pattern is created.)

The quantities for materials listed below are estimates of what I use for a particular medium to large size garment. Actual amounts used will vary, depending on size and personal preferences.

BASE FABRIC

4.5 mm silk gauze: un-dyed

3 yards for a chemise, or non-wrap vest

4 yards for a wrap front vest

FIBERS

superfine Merino, 19.8 microns, un-dyed

4 oz. for a chemise

6 oz. wrap front vest

Mulberry, bombyx or cultivated silk roving (also called “top” or “sliver”), a combination of dyed and un-dyed, for embellishment, 1 oz.

FABRIC FOR 3-D EMBELLISHMENT

3.0 mm silk gauze: 1 yard, un-dyed

4.5 mm silk gauze: 1 yard, un-dyed

5.0 mm silk habotai: 1 yard, un-dyed

EQUIPMENT & SUPPLIES

measuring tape

brown kraft paper: at least 30" x 6' (the type used for wrapping parcels)

masking tape: 1-2" wide (I prefer the green or blue painter's tape. It is easier to work with)

pencil

calculator

straight edge: alternatively, the edge of a metal measuring tape can be used

long straight pins: also known as quilting pins

scissors: if you have dedicated scissors used only for fabric, bring a second pair for cutting paper

(2) rolls of 2mm plastic sheeting: 9" X 12" package (found in paint dept.)

spray bottle: for water, should be able to spray a mist

small plastic tub or bucket: 1 qt. yogurt size or 1 gal. ice cream tub would suffice, for holding soapy water

ball brauser or sprinkling device: bring if you have one, several sprinklers will be available for use in the studio

old towels: 3 or 4 large; 2 "Sham Wow," or other artificial chamois, are extra absorbent and could replace 2 of the towels

wide bubble wrap: for fulling, not rolling; needs to be at least 30 inches long; two narrow pieces of bubble wrap can be taped together

apron or protective clothing: for dyeing

plastic disposable Solo cups: 10-12 cups, 10 oz.-16 oz., for dye solution, clear or white interiors so you can accurately see the colors, Solo cups are preferred because they will not shrink when hot dye solution is added

brushes: 2"-3" inexpensive, any type of bristle, will need 2-6 brushes or (use one and keep rinsing it out), a ½ inch brush for details is useful

JUDITH TO PROVIDE:

non-perfumed soap

non-latex gloves

ties

acid dyes

citric acid

colored fabric scraps

handspun yarn
